◇ +92 310 7111693 ◇ Portfolio

OBJECTIVE

Detail-oriented and motivated BSIT graduate with a strong foundation in Excel, PowerPoint, Word, SQL, Python, and Power Bl. Seeking opportunities to apply analytical and technical expertise to transform data into actionable insights. Dedicated to delivering measurable outcomes through business intelligence tools, data visualization, and stakeholder collaboration.

EDUCATION

BSc. Information Technology, Air University Islamabad *2020 - 2024*

Matriculation (Sciences) and ICS, Islamabad Model College for Boys G/10-4 *2015 - 2019*

SKILLS

Technical Skills	SQL, EXCEL, MS Suite, PYTHON, POWERBI, Power Query
Tools/Services	Visual Studio, Anaconda, Oracle SQL, MySQL, SSMS, Azure, AWS
Soft Skills	Adaptability, Problem-Solving, Communication and Presentation, Collaboration

EXPERIENCE

Silverlight Research Expert Network – Research Analyst *Jan 2025 – Present*

- Identify and analyze potential leads for various projects.
- Facilitate connections between industry experts and clients.
- Conduct research to support data-driven decision-making.

Neodocto Inc - Associate Data Analyst Internee *Jun 2023 - Sept 2023*

- Utilized SQL to query, extract, and transform large datasets, ensuring efficient data analysis and reporting.
- Developed interactive Power BI dashboards to visualize trends and insights, supporting decision-making for key stakeholders.
- Applied Excel for data manipulation, pivot tables, and statistical analysis to maintain data integrity and provide actionable insights.
- Automated data cleaning and analysis processes using Python.

PROJECTS

Air Quality Index US analysis | Python, SQL, PowerBI

- Analyzed multi-decade US air quality data using Python for cleaning, SQL for transformation, and Power BI for interactive dashboards.
- Delivered insights on state-wise performance and policy impacts on pollution levels. GitHub

Adidas Sales Analysis in PowerBi | Excel, PowerBI

- Evaluated sales trends and profitability through KPIs and data visualizations using Power BI.
- Included techniques like area charts for monthly sales, maps for regional distribution, and bar charts for retailer comparisons. GitHub

Assessment of Flood Destruction Through Remote Sensing in Larkana, Sukkur and Shikarpur, Pakistan | Blazor Dotnet, SQL, C#

1. Developed a flood damage assessment system for Sindh, Pakistan, using satellite data from Landsat-8, Sentinel-1, and Sentinel-2 to evaluate impacts on land cover, population, agriculture, and urban areas.
2. Utilized Google Earth Engine, JavaScript for data processing, and built a web application with HTML, CSS, C#, Blazor .NET, and SQL to present results for supporting recovery planning. GitHub

EXTRA-CURRICULAR ACTIVITIES

- Graphic Designing
- Running a Small Business
